The Registration & Login

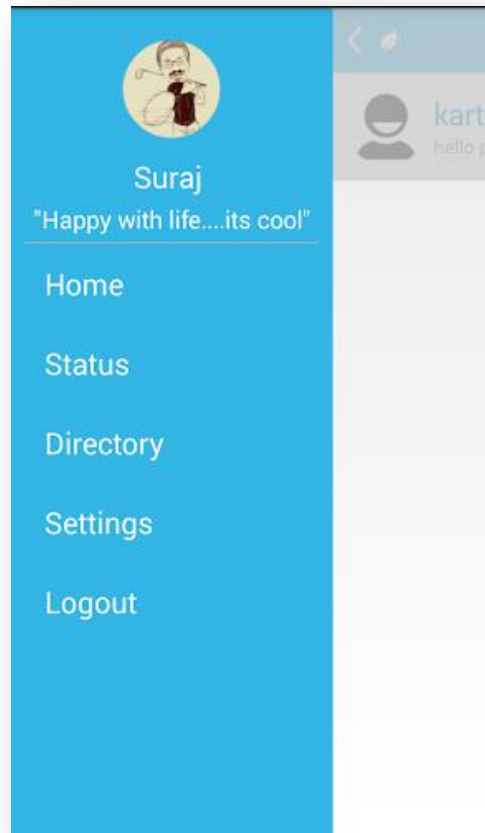

The app will open up to show the login and register option. For the users who have already registered, they could enter the user credentials to login to the app.

The image displays two mobile application screens side-by-side. The left screen is the login page, featuring the 'FreshIM' logo at the top, followed by input fields for 'username@company.com' and 'password'. Below these fields are two buttons labeled 'Login' and 'Register'. A red arrow points from the 'Register' button to the right screen. The right screen is the registration page, titled 'Register' at the top. It includes a profile icon placeholder, and input fields for 'First Name' (with 'first name' as a placeholder), 'Last Name' (with 'last name' as a placeholder), 'Email' (with 'username@company.com' as a placeholder), 'Password' (with 'atleast 6 characters' as a placeholder), and 'Status' (with 'status' as a placeholder). A 'Register' button is located at the bottom of this screen.

Alternatively, users can also create new user by clicking REGISTER option on the screen, as shown. The user can also select the image for the profile and add status.

The Dashboard

The dashboard of the app looks like as shown in the image below:

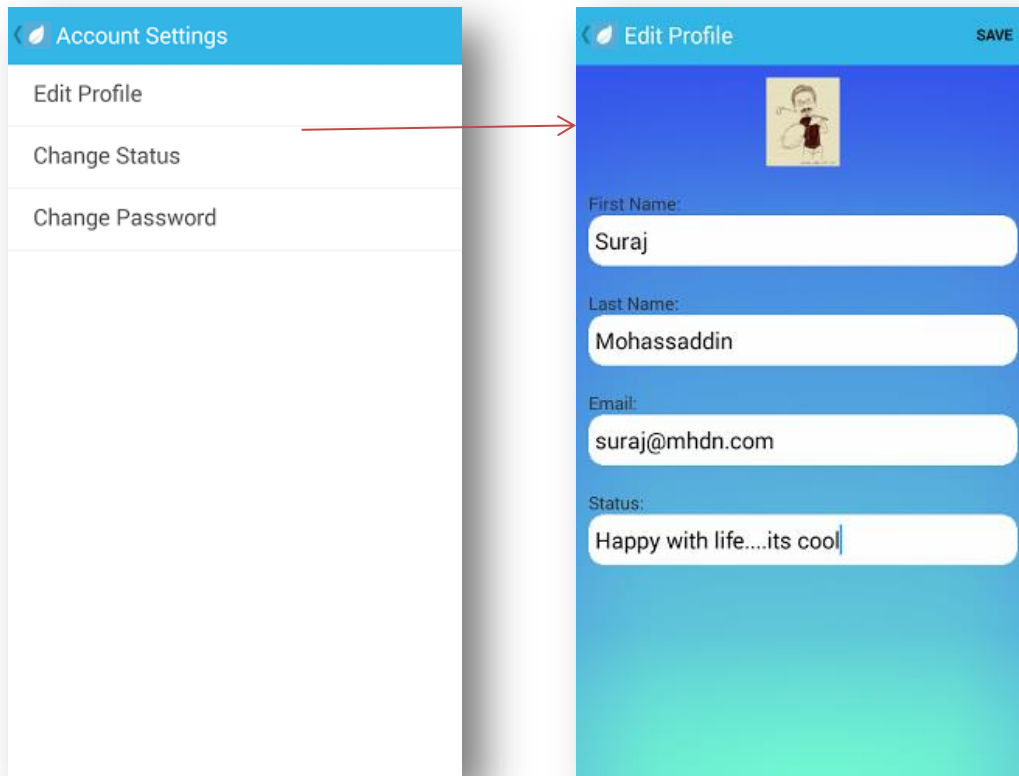

There are five major options:

- **Home** : Navigates to the main dashboard activity.
- **Status**: Allows user to change the status displayed in user profile.
- **Directory** : Section which allows users to group chat.
- **Settings**: General settings about the app
- **Logout** : Logout of the app

User Settings

Take a look at the user setting window below:

There are three major options: .

- **Edit Profile** : Edit Profile allows to edit the profile as shown in the figure
- **Change Status** : Enables user to change the status
- **Change Password**: Allows user to change the password. It is mandatory to enter the previous password before it assigns the user with a new entered password.

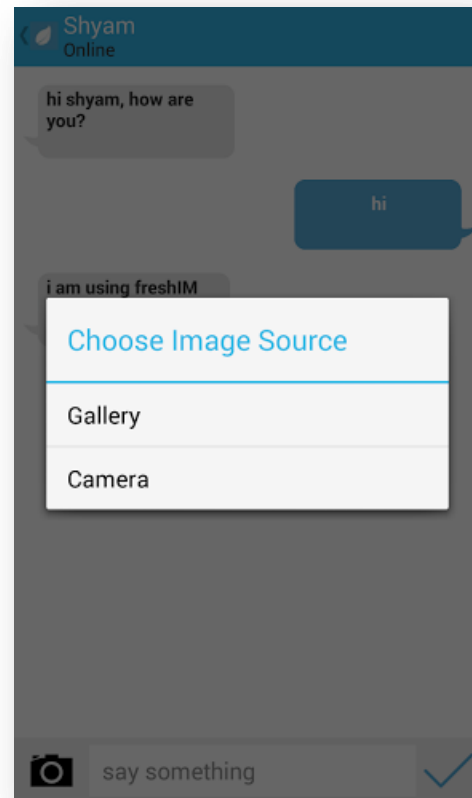

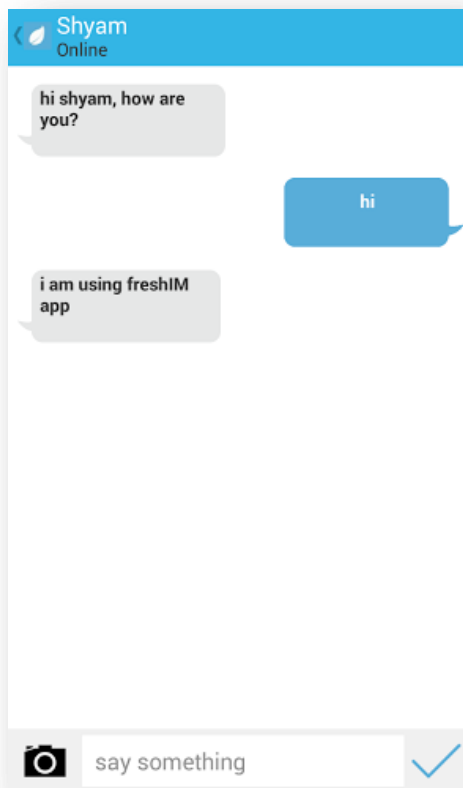

Status Window

This section lists down all the users which are Online & Offline. The green bullet mark shows the user is online, red otherwise.

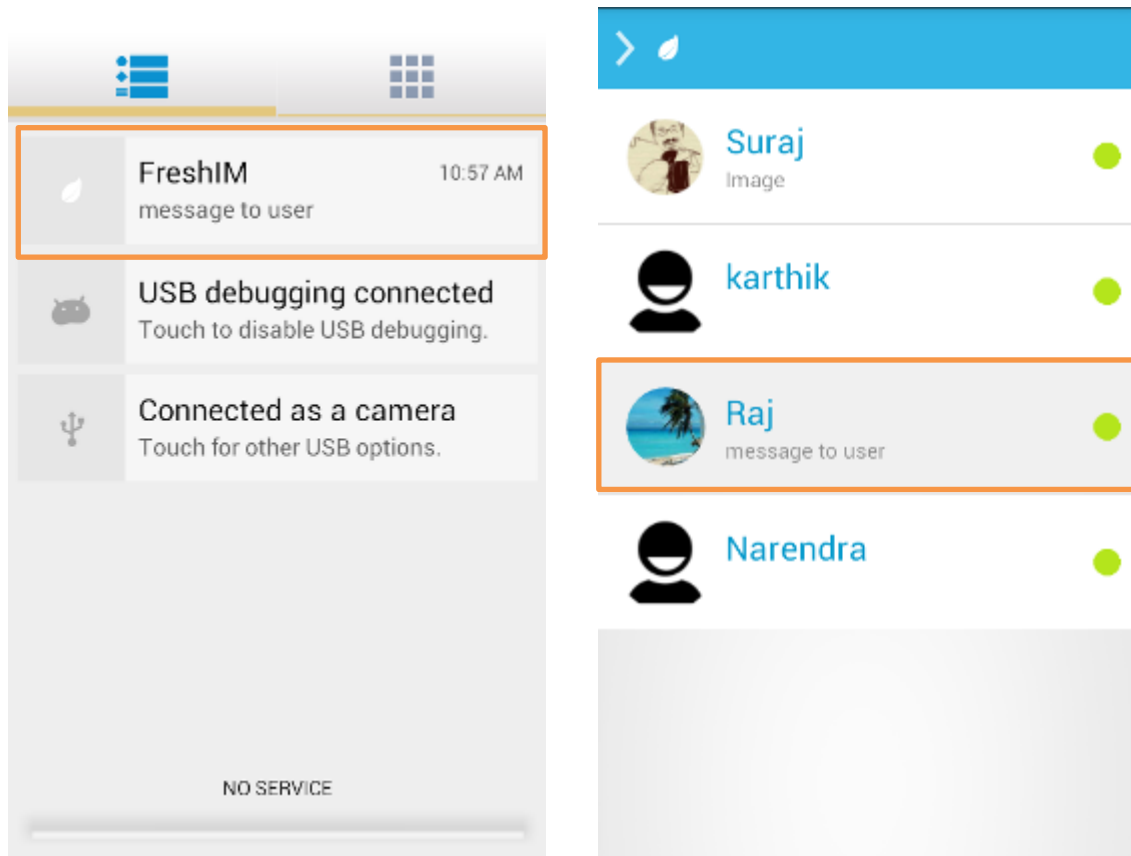

User Chat Messages

Allows user to chat with the user's which are online. User should click on the team member who is online from the Status window and it will then show a chat window with the person. The person can also click on the 'Camera' icon in the left to the chat type box to select image either from camera or the gallery.

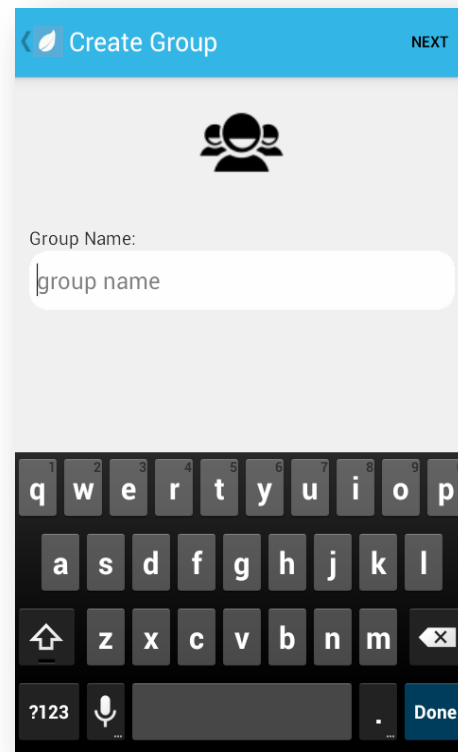

The message sent will be notified to the other user via push notification server as shown:

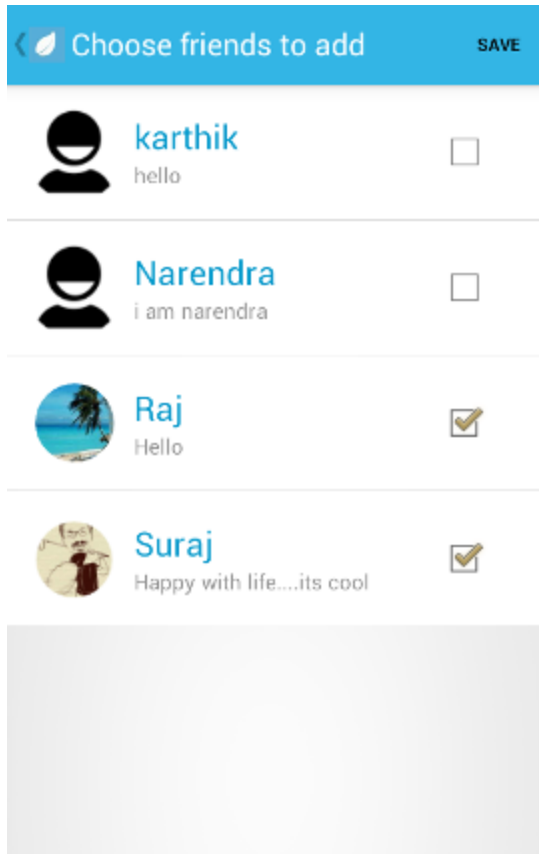

The list also shows the recent message highlight from the user.

Directory

This section allows user to create groups and to chat with the group. Users can also create new group and add members to the group.

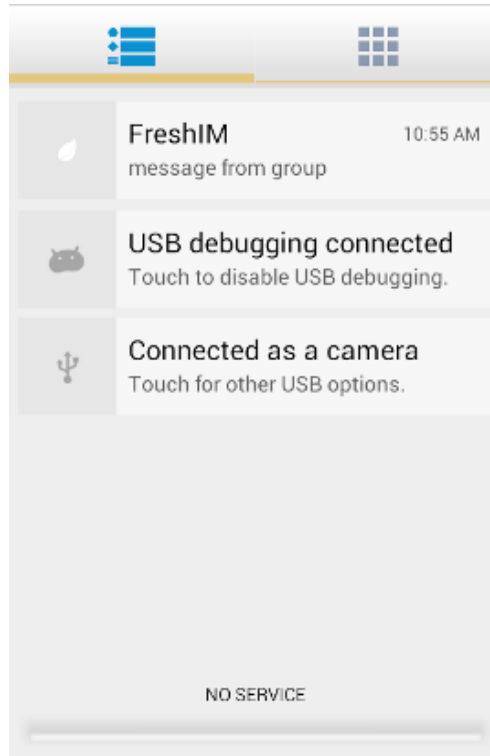

Once the members are added to the group, the users can go to DIRECTORY and see the groups they're part of. Clicking on the group, they can then send messages to the users. Once they receive messages, the notification shows up the message type.

< facebook

message from group

 say something 

The notification shade is pulled down, showing three notifications. The first notification is from 'FreshIM' with the text 'message from group' and a timestamp of '10:55 AM'. The second notification is 'USB debugging connected' with the text 'Touch to disable USB debugging.' and an Android robot icon. The third notification is 'Connected as a camera' with the text 'Touch for other USB options.' and a USB icon. At the bottom of the notification area, the text 'NO SERVICE' is visible.
