

How to manage Facebook Connect plugin?

This plugin enables your visitors to sign in to your site using their Facebook accounts.

Note: To be able to use the Facebook Connect plugin on your site, you should set up a Facebook application.

Facebook account configuration

Go to [Facebook Developers](#) page and click the “**Add a New App**” button.
Enter your application **Display Name** and **Contact Email**.

A screenshot of the Facebook 'Create a New App ID' form. The form is titled 'Create a New App ID' with the subtitle 'Get started integrating Facebook into your app or website'. It contains three input fields: 'Display Name' with the placeholder text 'My Facebook Connect display name', 'Contact Email' with the placeholder text 'Used for important communication about your app', and a 'Category' dropdown menu currently set to 'Communication'. At the bottom, there is a checkbox area with the text 'By proceeding, you agree to the Facebook Platform Policies', a 'Cancel' button, and a blue 'Create App ID' button. A mouse cursor is pointing at the 'Create App ID' button. In the top right corner of the form, there is a partially visible link that says 'Skip and Create'.

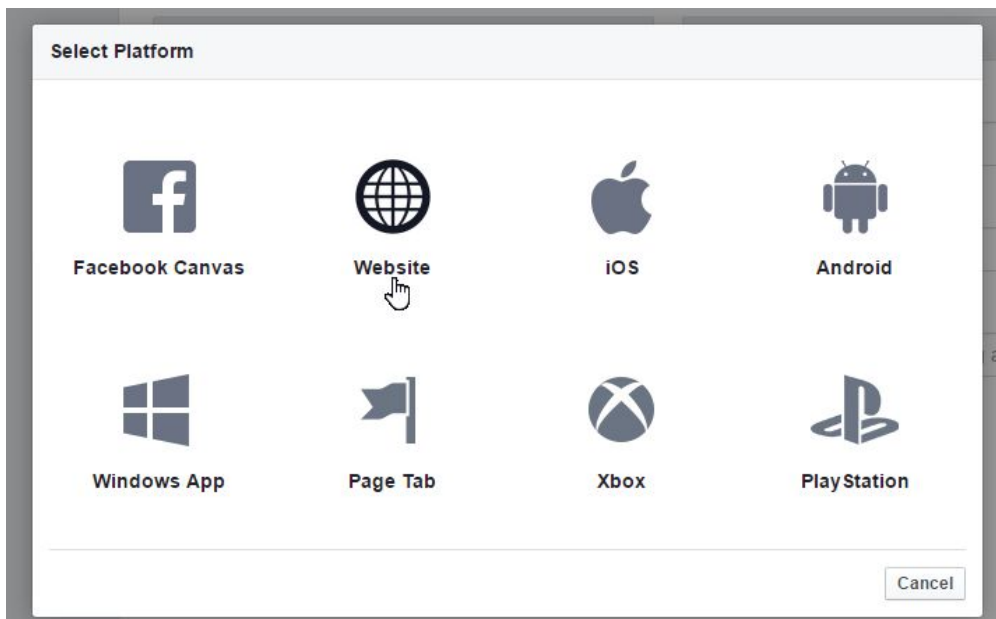

You will be directed to the application Dashboard page.

- Click **Settings** tab in the Sidebar menu.
- Enter your site domain name (e.g.:www.yoursitedomain.com) and Namespace.
- Enter Privacy Policy URL and Terms of Service URL
- Click the **Save changes** button.
