

How to manage User Credits plugin?

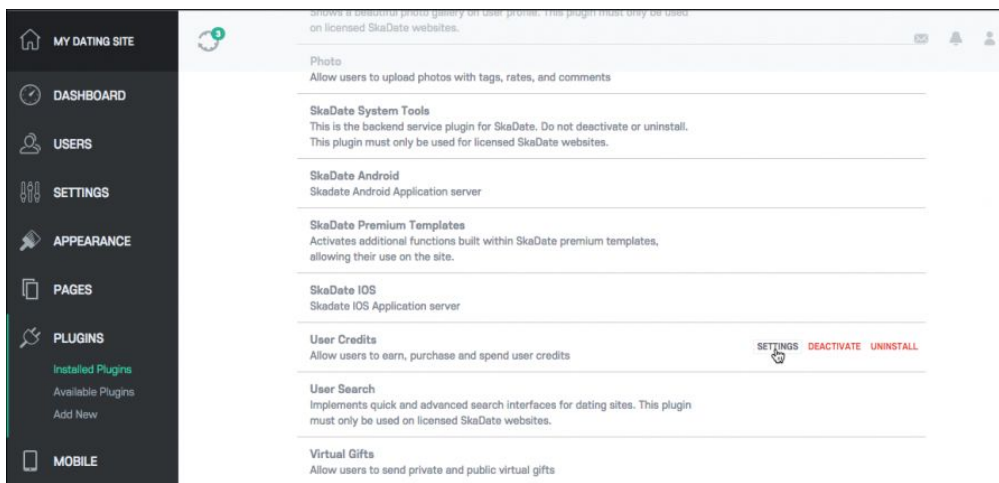

The User Credits plugin provides a site monetization advantage by allowing the Administrator to sell credits to users, who can then spend them on certain site features or actions.

Note: To be able to use the User Credits plugin on your site, you should first set up a Payment provider.

Admin side

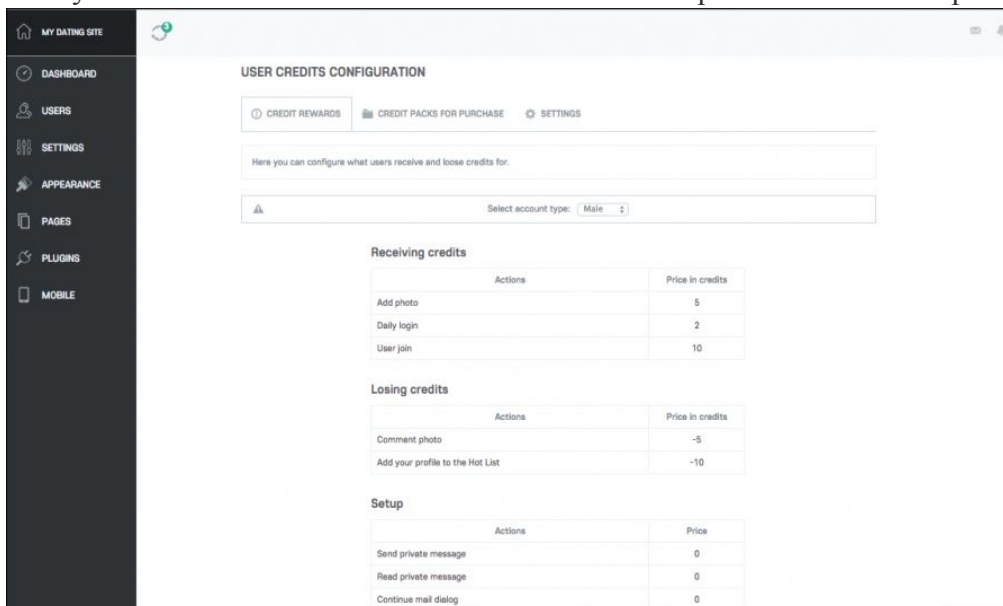

Go to Admin Area > Plugins > Installed Plugins.

Find the **User Credits** plugin - move mouse cursor over it, and click the **Settings** button.

You will be directed to the **Credit rewards** page.

Here you will see the list of the actions a site user can perform to earn or spend credits.

Every action can be configured to either earn credits to a user, or make the user spend them. Exception is the Virtual Gifts feature that won't allow users to earn credits. The list of actions is divided into three sections:

1. **Receiving credits** - this is the list of actions allowing users to receive credits to their balance.

If you want users to earn credits for a certain action - enter a positive value for it.

Receiving credits	
Actions	Price in credits
Add photo	5
Daily login	2
User join	10

2. **Losing credits** - this is the list of actions users spend credits for.

If you want users to spend credits for a certain actions - enter a negative value for it.

Losing credits	
Actions	Price in credits
Comment photo	-5
Add your profile to the Hot List	-10

3. **Setup** - this is the list of the non-configured (free) actions.

If you don't want a certain action to be credits-dependent - enter 0 for it.

Setup	
Actions	Price
Send private message	0
Read private message	0
Continue mail dialog	0

Note: To save changes press the 'Enter' key or click anywhere on the page.

There are two ways for a user to receive credits:

1. Purchase credits in a **Credits Package** (credit packs).

You'll need **Credit packs** to sell pre-defined amounts of credits to users.

You can create credit packs after setting up the value for each action.

-- Go to Admin Area/Plugins/Installed Plugins

-- Find the **User Credits** plugin, move the mouse cursor over it, and click the **Settings** button.

-- Click the **Credit packs for purchase** tab.

-- Add a new pack:

* Enter the number of credits to sell in the pack

* Enter the price for the pack

* Click the **Add** button

2. Site Administrator can give credits manually to a user right from the user's page. To give credits manually - you should go to the user's profile and click the **Credits** button in the Moderation menu.

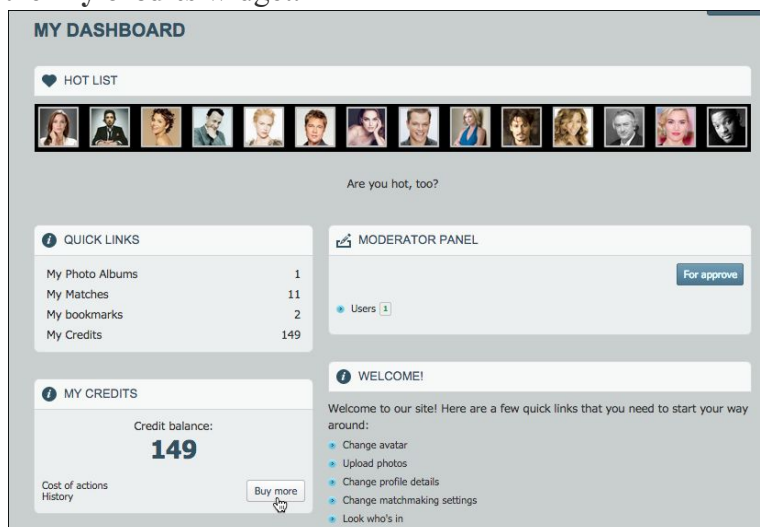

Enter the number of credits you'd like to give to the user, and click the **Save** button.

User Side

To buy more credits, a user should go to their Dashboard page and click the **Buy more** button in the **My credits** widget.

The system will redirect them to the **Buy credits** page, where they can choose a credit pack they'd like to buy, and proceed to checkout.
