

TWO FACT AUTHENTICATION

Readme

Mike G.

Short instruction

First thing you should know: you have to do nothing after you activated the Plugin.

Second thing you should know: the secret which is generated at `"/login/setup"` is NOT the Code for Login. You must insert this Secret in an App. Which App do you need depends on your mobile operating system. You can find a list of Apps at `"/login/help"`.

And that`s all :)
